

Beendigung der Causa K. Meßmer

Die Kritik an den beiden Arbeiten,

- Sunder-Plassmann L, Klövekorn WP, Holper K, Hase U, Messmer K:
The physiological significance of acutely induced hemodilution;
in Ditzel J, Lewis DH (eds): 6th European Congress of Microcirculation,
Aalborg 1970. Basel, Karger, 1971, pp 23-28
- Messmer K, Sunder-Plassmann L, Klövekorn WP, Holper K:
Circulatory significance of hemodilution: Rheological changes and
limitations.
Adv Microcirc 1972; 4: 1-77

nachzulesen unter [Causa Konrad Meßmer](#), wird vom Karger Verlag wie folgt beendet:

The books are not available online and can only be accessed by ordering a physical copy.

Therefore, we have concluded that, for the readers' information, we will send future orders of these books along with a copy of the article published by R. Zander in *Infusionsther Transfusionsmed* in 1999 (26 (4): 186-190. DOI: <https://doi.org/10.1159/000053488>
